This was supposed to come out back in 2010 and again in 2014 with a different cover. I wonder why it took seven years to get released? <https://i.imgur.com/L8sAjrY.jpg>

the quality of the vinyl is below average. very thin, for that expensive price! had same issues with other slice of spice vinyls. not cool!

Cordalas

Is there anywhere I can get a copy in the UK? The overseas shipping from the webstore is crazy expensive!

Why is is this being advertised as DJ Premier and Mc Eiht album even Premo is saying it as soon as I heard it I was like that doesn't sound like Premiers production and now I find out that most of the tracks on here are produced by Brenk Sinatra but honest I like the Premo produced tracks the best and wish it had all been produced by Premo

Qwert

See my comment above, it was delayed for years. So it probably was originally intended to be.

For the moment it is available only on dj premier official online store. So i wait a bit also as it will cost me two times the price to get it imported in Europe.
